Summary

Results-driven Software Engineer with 6+ years of experience in full-stack development, cloud-native microservices, and DevOps automation. Proficient in Java, Spring Boot, Python, and AWS with expertise in designing scalable distributed systems and CI/CD workflows. Delivered production-grade AI integrations using LangChain and LLaMA 3. Passionate about system design, clean architecture, and driving technical excellence in agile environments.

Experience

Software Engineer II ***May 2024 – Present***
FICO (Fair Isaac Corporation)

- Designed and deployed microservices architecture using AWS, Spring Boot, and Python for high-availability systems.
- Enhanced CI/CD pipelines with automated alerts, reducing release timelines by 30%.
- Built Business Knowledge Extraction System using LLaMA 3 (8B) and LangChain-based RAG pipelines.
- Developed MCP client and server within existing microservice ecosystem to summarize reports.

Software DevOps Engineer ***April 2023 – May 2024***
Philips Innovation Campus

- Managed AWS infrastructure across 5 environments using Terraform automation.
- Implemented one-click provisioning workflows and mentored junior DevOps engineers to improve deployment efficiency.
- Automated CI/CD pipelines with Jenkins and GitHub Actions to standardize releases.

Senior Software Engineer ***March 2022 – April 2023***
Philips Innovation Campus

- Delivered Tenant Onboarding EPIC leveraging Spring Boot and AWS Lambda, reducing onboarding errors by 60%.
- Integrated core services with AWS S3, SQS, and RDS to support scalable data processing.
- Collaborated with product owners and architects for end-to-end epic delivery.

Software Engineer ***August 2019 – March 2022***
Philips Innovation Campus

- Developed and maintained backend systems and DevOps automation tools in Python and Spring Boot.
- Maintained Terraform scripts for AWS infrastructure deployment and environment consistency.
- Built internal Python-based SDLC automation utilities that predicted project completion probability and timelines.

Skills

Programming: Java, Python, TypeScript
Frameworks: Spring Boot, Angular, LangChain
Cloud & DevOps: AWS (Lambda, S3, SQS, RDS), Docker, Terraform, Git, CI/CD
Database: PostgreSQL
AI/ML: MCP, RAG Systems, Fine tuning
Other: Microservices, System Design, REST APIs, Agile, Distributed Systems

Achievements

- Led end-to-end delivery of Tenant Onboarding EPIC for SaaS platform, improving onboarding time by 40%.
- Developed AI-powered Business Knowledge Extraction System recognized internally for innovation.
- Managed high-availability AWS infrastructure across multi-environment pipelines with zero downtime deployments.
- Led a team to victory in an internal innovation hackathon, competing against 40+ teams.

Education

Vellore Institute of Technology (VIT), India *2020*
M.Tech in Integrated Software Engineering (MIS) *8.85 CGPA*
